

About DNSEXIT.com: How is DNSExit.com different from other registration services?

A. Most domain registration sites leave customers without any DNS. DNSEXIT.com provides not only easy-to-use web interface for you to setup your DNS records, but also provide Dynamic DNS service so that cable modem, DSL, and dial up users can run web sites on their home pc. Unlike other DNS providers that will charge you \$30/domain/year for dynamic DNS service, our dynamic DNS is 100% free regardless where you register your domain name.
