Domain Name Registration: I have already registered a domain through other registrar. Can I transfer the domain to DNS Exit?

A. Sure you can. However, you can only transfer .com, .net, .org, .cc, .tv, .biz, .info domains to us. The tranfer will automatically extend the domain registration 1 year and you should submit the transfer request through us. You will need to obtain the domain's authorization code (password) from the domain's current registrar and unlock the domain to allow transfer. You can click here to start transfering the domain. Or your can click here to read more about the domain transfer.
